

ARAVIND R

Chennai, India — +91 93424 23726 — aravind.rameshrd@gmail.com
Portfolio — Linktree — GitHub — LinkedIn

Professional Summary

Pre-final year B.Tech (AI & Data Science) student with hands-on **full stack development** experience using **Java, Spring Boot, React.js, REST APIs, and MySQL**. Skilled in building **JWT-secured Spring Boot backends** and **React.js frontends**, with experience delivering production-aligned projects featuring role-based access control and modular architecture.

Education

B.Tech – Artificial Intelligence & Data Science

2023 – 2027

Saveetha Engineering College, Chennai

CGPA: 7.77

Technical Skills

Languages: Java, Python, SQL

Backend: Spring Boot, Spring Security, JWT, Hibernate, REST APIs, Microservices

Frontend: React.js, HTML5, CSS3, JavaScript

Databases: MySQL, Oracle SQL, H2

Cloud/DevOps: Docker, Render, Vercel, Railway, Linux

Tools: Git, GitHub, Postman, JUnit, IntelliJ

AI/ML: NLP, TF-IDF, Cosine Similarity, Streamlit

Core: OOP, DBMS, DSA, OS, Agile, SDLC

Projects

END-TO-END DOCUMENT INTELLIGENCE & DECISION AUTOMATION SYSTEM

GitHub —

Live Demo

Java, Spring Boot, Spring Security, JWT, React.js, MySQL, OCR, Docker

- Developed a full-stack document intelligence system with **Spring Boot, React.js, MySQL, JWT, and OCR** for secure document processing and workflow automation.
- Built a **dynamic Routing Rule Engine** for document type, OCR keywords, department routing, priority, and folder mapping without code changes.
- Implemented an **asynchronous document-processing pipeline** with background OCR jobs, status polling, and automated APPROVE / REVIEW / REJECT decision workflows.
- Designed **JWT-based RBAC** (SUPER ADMIN, ADMIN, MANAGER, REVIEWER, USER) with audit logging, notifications, and email document sharing.
- Developed advanced modules including **Priority Queue Management, Executive Analytics Dashboard, Document Viewer, and Reporting System** with PDF/CSV export.
- Deployed via **Render, Vercel, and Railway** with Docker-based CI/CD and GitHub version control.

BANKING MANAGEMENT SYSTEM — Full Stack Web Application

GitHub — *Live Demo*

Java, Spring Boot, Spring Security, JWT, React.js, MySQL, REST APIs

- Built a full-stack banking system with secure JWT authentication for account management, transfers, deposits, withdrawals, and transaction tracking.
- Designed RESTful **Spring Boot** APIs integrated with a **React.js** frontend and **MySQL** database for persistent transaction management.

AI RESUME ANALYZER WEB APPLICATION

GitHub

Python, NLP, TF-IDF, Cosine Similarity, Streamlit

- Built a resume analysis app using Python/NLP with **TF-IDF vectorization** and **cosine similarity scoring**, validated across **50+ test resumes**.

Work Experience

Full Stack Developer Intern – ApproTech

Jul 2025

- Designed and deployed **5+ RESTful API endpoints** using Java/Spring Boot; optimized MySQL queries, reducing response time by **~30%**.
- Implemented **Spring Security with JWT**, securing all endpoints; performed API testing via **Postman** across 10+ endpoints within **2-week Agile sprints**.

Achievements

- Participated in **Google Gen AI Exchange Hackathon** (Google Cloud & Hack2Skill) and **Hack Hustle Hackathon**, building AI-driven prototypes under competitive time constraints.

Certifications

Oracle SQL Certified Specialist — NPTEL — IoT (Elite) — PyTorch Ultimate — Azure Learning Challenge — JPMorgan Chase – SWE (Forage) — IBM – Software Engineering
