

ARAVIND R

Chennai, India — +91 93424 23726 — aravind.rameshrd@gmail.com

Portfolio — Linktree — GitHub — LinkedIn

Professional Summary

Pre Final year B.Tech student in **Artificial Intelligence & Data Science** with hands-on experience in **full stack development** using **Java, Spring Boot, React.js, REST APIs, and MySQL**. Proficient in building **Spring Boot backends** secured with **JWT and Spring Security**, and **React.js frontends** with Hooks and state management. Experienced in developing production-aligned projects demonstrating **end-to-end full stack architecture, role-based access control, and modular design**.

Education

B.Tech — Artificial Intelligence & Data Science

2023 – 2027

Saveetha Engineering College, Chennai

CGPA: 7.77

Technical Skills

Languages: Java, Python, SQL

Backend: Spring Boot, Spring Security, JWT, JDBC, Hibernate, Maven, REST APIs, Microservices

Frontend: React.js, React Hooks, HTML5, CSS3, JavaScript

Databases: MySQL, Oracle SQL, H2

Cloud & DevOps: Docker, Render, Vercel, Railway, CI/CD Basics, Linux

Testing & Tools: Git, GitHub, Postman, JUnit, IntelliJ IDEA, VS Code

AI/ML: NLP, TF-IDF, Cosine Similarity, Streamlit

Core Concepts: OOP, DBMS, DSA, OS, Agile, SDLC, System Design Basics

Projects

END-TO-END DOCUMENT INTELLIGENCE & DECISION AUTOMATION SYSTEM

GitHub —

Live Demo

Java, Spring Boot, Spring Security, JWT, REST APIs, MySQL, OCR, React.js, Docker, Maven, JUnit

- Engineered a **full stack document workflow system** automating ingestion of **200+ document types** – extracting structured data via OCR and routing decisions through dynamic business rules, eliminating manual review entirely.
- Built a **configurable rule engine** with 6+ threshold-based evaluation rules and required keyword checks per document type, reducing processing time by **~50%** compared to manual workflows.
- Designed a **three-tier decision pipeline (APPROVE / REVIEW / REJECT)** driven by weighted keyword-confidence scoring, with a validation guard that blocks any upload lacking a matching rule set – preventing unreviewed documents from entering the workflow.
- Implemented **JWT-secured REST APIs** with role-based access control (ADMIN, STAFF, VIEWER), full audit trail, and email notifications; containerized with **Docker** across 22+ production deployments.
- Designed **4 modular microservices** for document management, OCR processing, rule evaluation, and decision routing with clean REST API contracts and separation of concerns.
- Independently deployed and maintained full production infrastructure: **Spring Boot backend on Render, React frontend on Vercel**, and **MySQL on Railway**, with automated **UptimeRobot** health checks keeping free-tier services continuously live.

AI RESUME ANALYZER WEB APPLICATION

GitHub

Python, NLP, TF-IDF, Cosine Similarity, Streamlit

- Built a resume analysis application using Python and NLP to parse, extract, and score resumes against job descriptions; validated across **50+ test resumes** with accurate compatibility scoring.
- Implemented **TF-IDF vectorization** and **cosine similarity scoring** to quantitatively match resume content against job description keywords, surfacing missing skills and improvement suggestions.
- Automated keyword and structure analysis pipeline reducing manual resume screening effort by **~40%**, deployed via an interactive **Streamlit** interface.

Work Experience

Full Stack Developer Intern – ApproTech

Jul 2025

- Designed and deployed **5+ RESTful API endpoints** using Java and Spring Boot; optimized MySQL queries reducing backend response time by **~30%**.
- Implemented **Spring Security with JWT authentication**, securing all API endpoints and eliminating unauthorized access in the test environment.
- Built **3 reusable React.js components** with Hooks and Axios integration for seamless frontend-backend data flow.
- Performed end-to-end **API testing using Postman** across 10+ endpoints and collaborated in **2-week Agile sprint cycles** with consistent on-time feature delivery.

Achievements

- Participated in **Google Gen AI Exchange Hackathon** (national-level) by Google Cloud & Hack2Skill – built and presented an AI-driven prototype under competitive time constraints.
- Participated in **Hack Hustle Hackathon** collaborating in building real-world problem-solving solutions.

Certifications

Oracle SQL Certified Specialist — NPTEL – IoT (Elite) — PyTorch Ultimate (Coursera) — Azure Learning Challenge — JPMorgan Chase – SWE (Forage) — IBM – Software Engineering
